

AMENDMENTS TO THE CLAIMS

1. (currently amended) A recording medium comprising a recorded program and data to be used in a program execution system including a program execution device that executes various programs, at least one operation device into which are inputted operation requests by a user as operation instructions to said program execution device, and a display device that displays images outputted from said program execution device, wherein

said recorded program has a direction maintenance step by which if, along with a motion of any character on said display device, based on an operation instruction about a character motion direction, a switching is made from a first scene to a second scene on said display device and said operation instruction is maintained, and said direction of motion of said character in said second scene is ~~maintained in coordination with~~ determined by said operation instruction and said direction of motion of said character on a map in said first scene at least immediately before said switching is made, ~~said direction of motion of said character in said second scene being maintained for as long as said operation instruction is maintained by said user.~~

2. (previously presented) The recording medium as described in claim 1, wherein if said first scene on said display device is to be drawn based on a coordinate transformation based on a first viewpoint and said second scene on said display device is to be drawn based on a

3. (previously presented) A recording medium comprising a program and data recorded thereon and which are to be used in a program execution system including a program execution device that executes various programs, at least one operation device into which are inputted operation requests by a user as operation instructions to said program execution device, and a display device that displays images output from said program execution device, wherein said program comprises:

a first computation step which determines, from a motion vector of any character on

said display device by current operation instructions as seen from a prescribed viewpoint, at
